

Scope

The primary goal of the application is to help users solve their chemistry problems in a fast and easy way. When the user photographs or scans the problem, it will show the step-by-step process and solution.

Span

Time Frame

- The project will be submitted on May 4, 2022.
- Work will begin on March 8, 2022 and end on May 4, 2022.

Methodology

- The project will be handled using Agile methodology. The team will use Trello to manage each sprint.
- Meetings will be held weekly to report on progress and adjust the schedule if necessary.
